## DETAILED ACTION

### *Specification*

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/31/2003 has been entered.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 21 recites the limitation "the form of channels" in lines 8-9. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2, 6, 11, 15-17, and 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheng et al. (5,901,038).

Regarding claims 1-2, 6, 15, Cheng disclose a connector (105, Figure 2) comprising:

a housing having a main body (200) and a pair of arms (115);

group of contacts (120);

a first ventilation opening (an open area defined by legs 110 and the main body 200, see Figure 1) is disposed under the main body provides air to flow between the mother board and the electronic module;

a second ventilation openings in the form of a channel (an open area defined by legs 110 and the arm 115, see Figure 1) are disposed under the pair of arms and enable air to flow between the mother board and the electronic module;

a wall member (110) are provided under the pair of arm.

***Response to Arguments***

7. Applicant's arguments with respect to claims 1, 2, 11, 15-17, and 20-21, have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2833

***Allowable Subject Matter***

5. Claims 3-5, 7-10, 12-14, 19, and 22-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Regarding claims 3, 10, and 22-24, the prior art of record fails to teach a rectifying means has an opening to take in air.

Regarding claim 4, the prior art of record fails to teach supporting means provided at an ends of the pair of arms for an end of the electronic module to rest on.

Regarding claim 5, the prior art of record fails to teach the second ventilation means has a configuration to extend in opening toward outside.

Regarding claims 7-9 and 18, the prior art of record fails to teach attachment portions are formed at front and rear portions of the pair of arms to interconnected pair of arms of two or more adjacent connectors.

Regarding claim 12, the prior art of record fails to teach a closure means to close space between the front contact and rear contacts.

Regarding claims 13-14, the prior art of record fails to teach a dustproof means provided at the front and rear contacts.

***Conclusion***
